# GENERAL INFORMATION

Visit and explore all the best destinations that Botswana has to offer. This country is home to an incredibly diverse environment hosting a wide variety of Africa's biggest and smallest fauna and flora.

There are very few places left where you can travel around for days in an environment that is largely unaffected by human development. Botswana does have large and diverse tracts of protected land, set aside as wildlife reserves and national parks. Visitors to Botswana are able to get a good feel of the wild Africa described by early explorers.

These Safaris are a mobile adventure through multiple destinations in Botswana, seamlessly sewn together by the experts. When partaking on private safaris, guests have options to camp in Moremi Game reserve, Central Kalahari, Makgadikgadi Pans, Nxai Pan, Khwai as well as Savute Northern Chobe.

Pre-prepared camps are located in private BOGA (Botswana Guides Association) or HATAB (Hospitality and Tourism Association of Botswana) sites, well off the beaten track.
